

Welcome to Tricked n' Tuned!. To jump into the action quickly you can hit the quick race button from the main menu, or to start your career; hit play game to start a new profile.

For Technical Support:

- Please make sure your went to the web and downloaded all the latest drivers for your hardware. This especially includes the latest drivers for your sound card and video card as they can cause intermittent crashing if they are out of date.
- For further Tech Support please go to: WWW.TRICKEDNTUNED.COM

Helpful descriptions of the menus and there main functions:

Main Menu:

- | | |
|-------------|---|
| Play Game- | This starts your street racing carrier. |
| Quick Race- | A fast way to get into the action. Each race randomly pulls up an average quality car to race with. |
| Options- | Make sure you check your setup for Video / Controls / Audio here. |
| Exit- | Back to windows. Huh... are you sure? |

Options Menu:

- | | |
|--------------------|--|
| Controller- | Takes you to where you can set / survey your keyboard our gamepad options |
| Display and Sound- | Brings you to the Audio and Video settings screen. If you have a killer rig you can turn your settings all the way up! |
| Credits- | The production and development crews. |

Profiles Menu:

- New- Click this button to make a new profile.
- Delete- Select an existing profile and click this to wipe it out!
- Save- Make sure you save before leaving our you'll loose your progress.
- Single Player- Enters the primary game play mode and starts your street racing carrier.
- Multi Player- Challenge online players to drag racing events.

The Dash Menu:

- Interactive display window- Rotates automatically. If you put your cursor over the car in the window you can use your mouse wheel to zoom in and out. Also when you click and rotate the car to any view.
- Trade Car- Unlocked a new car body? Or just want a change of pace then click this to swap out to a new car body.
- Test Ride- Alone in the parking lot at night...the perfect spot to try out some moves before hitting the streets.
- Upgrades- The parts store where you can take a junker car and bling it out to the extreme...if you have the coin that is.
- The Streets- Head out to the streets to find a gang to challenge.

Bang Button List-

Green Counter-
Respect Counter-

What is a car without performance? Be sure to stock up on the latest gear so you wont look like a chump at the line.

How much money you have on hand.

What the other racers think about your style.

Select color-

Click on a color button to get a preview of how your car looks with different schemes. If you found one you like then select the level of gloss you want from the buttons below.

Select color-_____Pick between the most common colors in neon technology.

Upgrades Rim Shop:

Select Rim Shop-

Up on the top of the screen is the various rim shops to click on. Each new unlocked shop will bring you a new page of wild rim designs.

Select Rim Style-

Select the rim you want mounted on your car and click the install button below.

Gang Select Menu:

Select Gang-

As you beat each boss leader, more gangs will think your worth racing against. Work your way up though the pecking order to become the king of the streets. Remember you can Re-race old gangs for a shot at more money.

Event Select Menu:

Select Race 1 Mile -

This is a race vs the gangs lower tier racers. Contend with 2 other cars in a 1 mile race.

Select Race ½ Mile-

Faster opponents and a shorter course.

Select Race Stunt Challenge-

A frantic cannonball to the finish hitting enough jumps to beat the gang boss's point score.

Select Race Boss Challenge-

This is it. A one on one race though a special home turf 1/4 mile drag race. Expect the unexpected!

Event Pre Race Info:

Event Text window- Lists the dialog between you and the challengers. May include hints or instructions on how the race is laid out.

Select Transmission- All the “newbs” use automatic, but the ‘pros’ know how to use gear shifting manual to gain the advantage!

In Game Race Display:

Gang Symbol- Upper Left is the tag of the gang your up against.
Radar Detector- On the bottom of the screen. Radar upgrades will help you detect potential speed traps with earlier warnings and stronger signals. Remember if your in a speed trap if you slow down under 50mph soon enough you may just get out of the ticket!

Boost Light- Indicates if you have blown you nitrous oxide or not. Bigger upgrades produce more boost.

Opponents Times- Tracks telemetry on how your doing with your competition.
Time Limit- On stunt levels you have a countdown timer in the upper center. You must crossover to the finish line before the time is up.

Post Race Stats Screen:

Stats Tracked- Displays multiple stats on how your last race turned out.

Multi-Player Setup:

- | | |
|----------|--|
| Host- | Click here to host a new multilayer game. |
| Join- | Select a game off the list above and click the join button to jump on in. |
| Join IP- | You can type a specific Internet Protocol of a computer you know you want to connect to. |
| Refresh- | If your waiting to join a game but you don't see it on the list yet; hit the refresh button periodically to see if it pops up. |

Host Lobby:

- | | |
|-----------------|---|
| Choose Track- | Changes the track to race on. |
| Change Profile- | Lets you select a new profile to race with. Grabs only from existing profiles you created before joining a multi player game. |
| Ready Race- | Click this to let the others know your ready to race. When all the players click there ready button the race can begin. |

Game Hints and Tips:

- 1- If you can't beat a certain race event go back and re-race some lower events to make some extra coin. Then buy a few performance upgrades to give your car the edge again.
- 2- Earn extra respect points buy buying high level visual and audio upgrades.
- 3- Don't forget about trading in your car body for the latest and greatest car body choices.
- 4- Using manual transmission can give you more control during the race. You can rev up your rps and drop it into gear off the line. Also up and down shifting can help your acceleration arc if done at the correct time.
- 5- If your respect rank is high enough, you may get the option to have your ride bling'ed out buy a custom mod team. You cant go back to your old body look after this is done but they never had a dissatisfied customer!

Default Control Scheme:

W - Accelerate

A - Left

D - Right

S - Brake

E - Shift Up

Q - Shift Down

Space Bar - Skip Intro Cam / Handbrake

B - Boost

F1 - Reset Car

F2 - Change Camera if Purchased

O - Horn

H - Turn the HUD off

P - Pause

ESC - Back to Menus
